

SPEX®

NEWS BRIEF: Our Accreditation Is Evolving— Our Quality Remains the Same

At SPEX CertiPrep LLC, we are excited to share an important update regarding our accreditation and how it will appear on the Certificate of Analysis (CoAs).

We are transitioning our accreditation from A2LA to ANAB, with completion expected by **February 2026**. While you may notice a change in the logos on the CoAs, we want to assure you that this will have no impact on our products, processes, or the quality you rely on.

What is changing:

As part of this process, you will begin to see only the ISO 17034 accreditation mark displayed on the CoAs. ANAB policy requires that when a company like SPEX CertiPrep is accredited to both ISO/IEC 17025 and ISO 17034, the Certificate of Analysis for a reference material must display only the ISO 17034 symbol.

To ensure accurate and compliant representation of our accreditation, the ISO 17025 logo will therefore be removed from the CoA, and only the ISO 17034 mark will remain.

Our ISO 17025 accreditation remains fully in place, and there is no change in our testing capabilities, quality systems, or the accuracy behind your certified products.

Previous CoA	New CoA
 Reference Materials Producer Cert #2495.01	  ANSI National Accreditation Board ACCREDITED ISO 17034 REFERENCE MATERIAL PRODUCER
  Chemical Testing Cert #2495.02	ISO 17034:2016 Certificate AR-3437

What remains the same:

- SPEX CertiPrep continues to be accredited to both ISO 17025 and ISO 17034, as outlined on the second page of the CoA.
- All products will continue to be prepared and certified using the same methods, controls, and quality systems that have always defined SPEX CertiPrep.
- The scope of our accreditation, technical practices, compliance standards, and commitment to excellence are unchanged.

You will continue to receive the same high-quality products, supported by the same robust processes and experienced team you have trusted for over 70 years.

We appreciate your continued trust and partnership. As always, we remain committed to delivering products that meet the highest standards of accuracy, reliability, and quality.

Sincerely,
The SPEX CertiPrep Team
