

**O'nyong'nyong Virus (ONNV)  
Strain: Ahero  
Infectious Culture Fluid (1 mL)**

**PRODUCT DESCRIPTION:**

O'nyong'nyong Virus (Strain: Ahero) is a single stranded positive sense RNA virus. ONNV belongs to the genus *Alphavirus* of the family *Togaviridae* and is primarily transmitted through the bite of *Anopheles funestus* and *Anopheles gambiae* mosquitoes.

Each frozen aliquot contains 1 mL of titered viral culture fluid.

**INTENDED USE:**

Viral culture fluids are sold as consumable testing materials; propagation or commercialization is prohibited without prior written consent from ZeptoMetrix. The suitability and performance characteristics should be determined by your laboratory for each intended usage.

These products are NOT intended for use in the manufacture or processing of injectable products subject to licensure under section 351 of the Public Health Service Act or for any other product intended for administration to humans.

**FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.**

The purchase of infectious microorganisms from ZeptoMetrix requires a Material Transfer Agreement (MTA).

**BIOSAFETY:**

O'nyong'nyong Virus is a Biosafety Level 2 (BSL-2) microorganism and must be used within a BSL-2 facility in a biosafety cabinet (BSC). Please consult your institution's regulations regarding the use of this product. For a detailed discussion on biological safety see the current edition of Biosafety in Microbiological and Biomedical Laboratories (BMBL), published by the CDC.

**PRECAUTIONS:**

- Use Universal Precautions, this product is **potentially biohazardous**.
- Repetitive freezing and thawing is not recommended (aliquot material if necessary). Titer will be altered by multiple freeze-thaws.
- To avoid cross-contamination, use separate pipette tips for all reagents.

**RECOMMENDED STORAGE:**

Viral culture fluids should be stored at -65°C or below.

**\*This strain is sourced and used under license from the National Collection of Pathogenic Viruses (NCPV®), Public Health England.**
