

VeroE6 Culture Fluid (Heat Inactivated) (1 mL)

PRODUCT DESCRIPTION:

VeroE6 cells are normal African Green Monkey (*Cercopithecus aethiops*) kidney cells that grow in culture as an adherent monolayer. As cells grow, they exhibit an epithelial morphology. This cell line is a clone of Vero 76 cells.

Each frozen aliquot contains 1 mL of heat inactivated culture fluid. The cell count was determined by an average of multiple aliquots before inactivation.

INTENDED USE:

Heat inactivated culture fluids are sold as consumable testing materials. The suitability and performance characteristics should be determined by your laboratory for each intended usage.

These products are NOT intended for use in the manufacture or processing of injectable products subject to licensure under section 351 of the Public Health Service Act or for any other product intended for administration to humans.

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.

BIOSAFETY:

Please consult your institution's regulations regarding the use of this product. For a detailed discussion on biological safety see the current edition of Biosafety in Microbiological and Biomedical Laboratories (BMBL), published by the CDC.

PRECAUTIONS:

- Use Universal Precautions, this product is **potentially biohazardous**.
- Repetitive freezing and thawing is not recommended (aliquot material if necessary).
- To avoid cross-contamination, use separate pipette tips for all reagents.

RECOMMENDED STORAGE:

Heat inactivated culture fluids should be stored at -65°C or below.
